

# American Helicopter Society Southwest Chapter presents...

## Robert Wetherall

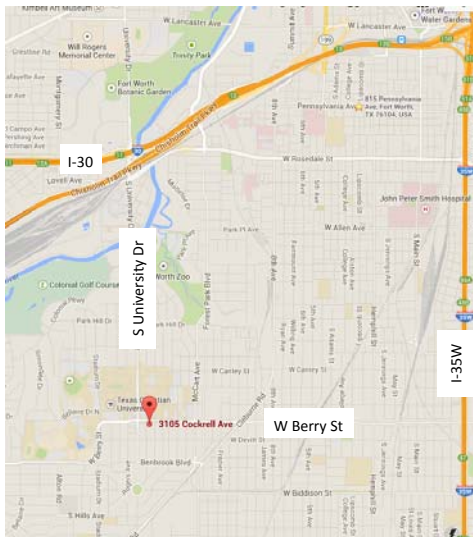

Program Manager, Aerial Reconfigurable Embedded System (ARES)

### The DARPA ARES Program

Wednesday, May 20, 2015

Mr. Wetherall has 37 years experience in the Aerospace field. Including configuration design and development of integrated flight hardware for a number of aircraft, including F-111, F-16XL, B-2A, YF-22, F-22, A-330 and X-33, followed by 12 years leading Space Transportation Architecture Studies, Single Stage To Orbit development, Space Launch Initiative studies and Hypersonic Flight Vehicle configuration development. Mr. Wetherall is a recipient of Lockheed Martin's highest award, the NOVA, for leading the development and demonstration of the Falcon HTV-2

The DARPA/AFRL Aerial Reconfigurable Embedded System (ARES) Program, a modular, autonomous, multi-role VTOL delivery system is scheduled to fly in late 2015. The ARES vehicle is designed to support multiple missions and enable new and powerful operational concepts.
