Drone Light Show Technology

Preston Ward

Rick Boss

Sky Elements is the leading provider of drone light shows in North America. Their drone light shows are made to inspire both in person and on video. Though located here in North Texas, their work has been on display across the nation and they are the proud winners of a Guinness World Record for “largest aerial sentence” formed by drones, achieved during the North Richland Hills Fourth of July celebration!

Preston Ward is a practicing attorney who has a love for fireworks, drones, and all things technology. As Chief Pilot, he is Sky Elements’ drone flight expert. He has flown all over North America piloting countless drone light shows and has an expansive knowledge base that has been honed by hours of flying in different environments. Preston has a degree in business administration with an emphasis in information systems from the University of Texas at Arlington. He also obtained his Juris Doctorate from the Texas A&M School of Law, and LLM from the University of Texas at Austin.

Rick Boss leads the Sky Elements Business Development side and spearheads the team’s product management and sales division. As the Director of Business Development, he is the face of Sky Elements and works tirelessly to ensure that the drone light show experience is seamless for clients from start to finish. Rick’s coordination, business acumen, and years of experience leading successful startups help keep the company moving forward on the right path, making him a key component of their team’s success.
